The future of Generative AI

Bigger, better models	From chat to actions	More governance
• LLMs are expected to become more sophisticated • LLM's will become more multi-modal (text, images, audio, and video)	• LLMs will perform actions in addition to generating text • LLMs will be integrated with other technologies, such as IoT, to provide more responsive environments.	• Inevitable that regulators and governments will begin to monitor and dictate practices • Robust data privacy, security regulations, and transparency will become crucial
